

Stefan Jugelt

Project officer European Railway

Agency (ERA)

Stefan Jugelt is working for the European Railway Agency (ERA) in Valenciennes (France). He is responsible for the development of the technical standards for telematics applications for passengers and freight. His main tasks are the management of the further developments of the Technical specifications for Interoperability (TSI) and the technical documents, the monitoring of the implementation of the telematics applications in the European rail sector and the dissemination of these TSI's.

Before his career at the European Agency he has worked for more than ten years as software developer in the semiconductor industry. He was responsible for the software development and system integration for semiconductor manufacturing lines.

He held a diploma in automation technology from the "Hochschule für Technik und Wirtschaft (FH)" in Dresden (Germany).
